

Chromatography Solutions

Chromatography Solutions

SK pharmteco is your trusted partner for your purification needs. With decades of experience in manufacturing using chromatography, we provide safe, compliant, optimized, and robust solutions. We support all scales of production - from development to clinical support to commercial quantities under CGMP.

Our Services

- Separation screening (batch & continuous)
- Method development
- Proof-of-concept / demonstration
- Production from gram to multi-ton quantities
- Analytical testing services

Typical Applications

- Chiral separations (e.g., enantiomers, atropisomers, etc.)
- Separation of diastereomers & regioisomers
- Removal of troublesome or genotoxic impurities
- Other complex separations

OUR FOCUS

Delivering Value to You

 **Experience:** We have decades of experience producing commercial-scale APIs using Simulated Moving Bed (SMB) technology, including supporting 4 FDA/EMA-registered products. We ensure a seamless partnership with prompt communication and a dedicated program manager to keep you informed at every step.

 **Expertise:** We deliver efficient and reliable results to your program, applying our extensive expertise in developing and optimizing chromatographic separations for commercial-scale APIs.

 **Quality:** We adhere to the highest standards of quality, supported by a successful track record with the FDA, EMA, PMDA, and other agencies.

 **Scalability:** We ensure a smooth and rapid scale-up of your APIs from lab to commercial production, all under strict CGMP standards.

 **Cost Reduction:** Our application of automated technologies delivers higher purity, increased yields, and lower costs, enhancing your competitiveness.

 **Green Chemistry:** Our solvent recycling strategies at large scale drive significant PMI reduction making chromatography a green process (over 99% reduction in waste generation).
